

User Input w/ Conditions

1. Run/Execute fav_color.py
2. Discuss
3. CTRL + N
4. CTRL + S
5. Name it rollercoaster.py
6. Save it in YOUR directory (folder)

CHALLENGE: We need to make a program that asks the user for their current height in inches. Then, based on what the user types in

```
1 height = raw_input("How tall are you in inches? ")
2 #height = int(height)

3 if height >= 46:
4     print("\nYou're tall enough to ride!")
5 else:
6     print("\nYou'll be able to ride after you eat your veggies.")
```
